improved by streaming movies including fast forward, pausing or rewinding functions, and search functions. This article highlights that streaming quality movies as an industry will only increase in time, because advertising revenues continue to soar on an annual basis across industries, providing incentives for the production of quality content.

BDRips come from Blu-ray discs and are encoded to lower resolution sources (ie 1080p to 720p / 576p / 480p). BRRip is a video that has been encoded at HD resolution (Naked Singularity usually 1080p) which is then transcribed to SD resolution. Watch Naked Singularity The BD / BRRip Movie in DVDRip resolution looks better, however, because the encoding is from a higher quality source.

During the endless final sequence of "Naked Singularity," Porky Pig calls himself "the
Notorious P.I.G." and begins to rap. "This pig is lit," the Looney Tune says. "I'm super legit."

Porky should've added: "And my movie is s-t."

In the pantheon of misguided sequels and reboots, "A New Legacy" is right up there with
"Paul Blart: Mall Cop 2" and "Little Fockers." The original 1996 "Space Jam" wasn't
top-drawer either, but it made a buck at the box office. So, money-grubbing Warner Bros.
took 25 years to crank out a follow-up that's far, far worse. And they know it.

Over its interminable, nearly two-hour runtime, the film repeatedly mocks its very existence.

“I’m a ballplayer,” says star LeBron James, taking the reins from the original’s Michael Jordan, during a pitch meeting with WB execs. “And athletes acting — it never goes well.”

That’s especially true of cardboard James.

The villain of the movie is the WB algorithm, called, ugh, AI G. Rhythm (Don Cheadle), who is responsible for drumming up all of the studio’s soulless content, such as ... this!

When LeBron arrives in Tune World, where all the Looney Tunes are supposed to live, he finds it largely abandoned. Bugs Bunny tells the Laker his animated pals left home for more appealing properties: Harry Potter, DC Comics, “Game of Thrones,” etc. That’s also what viewers have done: Today’s kids are much too busy monetizing their TikToks to watch a cartoon about a hunter with a speech impediment.

The plot, such as it is, is much the same as the '96 movie, except the alien foe has been changed to a computer. The technology infusion robs the film of fun. AI zaps LeBron and his video-game-obsessed son Dom (who is not actually his child, but actor Cedric Joe) into “the Serververse” and challenges him to a basketball game against the menacing Goon Squad.

If LeBron wins, the pair gets to go home. If he loses, he’s trapped for all eternity — a feeling I was all too familiar with.

While LeBron recruits his scrappy team, Warner Bros. makes us watch a long HBO Max ad. Mad Max, Austin Powers, Rick and Morty, Batman, Harry Potter, “Casablanca” and more flash across the screen in a montage, as if to brag about the studio’s extensive catalog. It’s one of director Malcolm D. Lee’s many strategies to avoid developing characters or having funny scenes. Eventually, LeBron settles on Bugs, Daffy Duck, Elmer Fudd, Lola Bunny & Co. to help him win.

All along, the movie blares its obnoxious “Be yourself!” message like a foghorn. At the start, LeBron aggressively pushes Dom to become a ballplayer like him and forces the teen to practice for hours on end. “You can’t be great without putting in the work!” he says. But Dom only wants to design video games in his bedroom.

You can probably guess that when the two are sucked into a computer, LeBron suddenly develops a newfound appreciation for his son’s coding abilities.

Some of the first film’s problems can be forgiven by its sheer camp value and because it was a real cultural event. Getting Michael Jordan, the most famous athlete in the world, into a movie was a huge deal. And the film’s soundtrack, whose big song “I Believe I Can Fly” was regrettably performed by R. Kelly, went six times platinum.

This film, however, is nothing more than forgettable nostalgia bait.

Like they do with most reboots, audiences are gonna stick with “Space Jam’s” old legacy.

Naked Singularity: How Can I Watch The Movie On HBO Max

The game of the century is back. This Friday, July 16, 'Naked Singularity' opens in theaters in the United States and in other parts of the world as well. It is one of the most anticipated films of the year.

The return of the Looney Tunes to the courts, now teaming up with LeBron James, has drawn a lot of attention from those fans who grew up watching the Tunesquad face the Monstars alongside Michael Jordan.

26 years after the first film that was a great success around the world, comes the sequel that promises a more technological world that in addition to LeBron James will also have other great players from the NBA and the WNBA. How can I watch the Naked Singularity movie?

The film will be released in theaters this Friday, July 16, however, you can also watch it through HBO Max. As has become customary in recent months, the premiere is simultaneous and from 03:00 ET you will be able to see the film.

Yes, the movie will be available on HBO Max for ad-free subscribers. Like the rest of the Warner Bros. movie lineup, Naked Singularity will be available at no additional charge to HBO Max subscribers. That said, it's only available in the United States and again, only for the ad-free package, which costs \$ 14.99 per month.

Film, also called movie, motion picture or moving picture, is a visual art-form used to simulate experiences that communicate ideas, stories, perceptions, feelings, beauty, or atmosphere through the use of moving images. These images are generally accompanied by sound, and more rarely, other sensory stimulations.[1] The word "cinema", short for cinematography, is often used to refer to filmmaking and the film industry, and to the art form that is the result of it.

👑👑👑 STREAMING MEDIA 👑👑👑

Streaming media is multimedia that is constantly received by and presented to an end-user while being delivered by a provider. The verb to stream refers to the process of delivering or obtaining media in this manner.[clarification needed] Streaming refers to the delivery method of the medium, rather than the medium itself. Distinguishing delivery method from the media distributed applies specifically to telecommunications networks, as most of the delivery systems are either inherently streaming (e.g. radio, television, streaming apps) or inherently non-streaming (e.g. books, video cassettes, audio CDs). There are challenges with streaming content on the Internet. For example, users whose Internet connection lacks sufficient bandwidth may experience stops, lags, or slow buffering of the content. And users lacking compatible hardware or software systems may be unable to stream certain content.

Live streaming is the delivery of Internet content in real-time much as live television broadcasts content over the airwaves via a television signal. Live internet streaming requires

a form of source media (e.g. a video camera, an audio interface, screen capture software), an encoder to digitize the content, a media publisher, and a content delivery network to distribute and deliver the content. Live streaming does not need to be recorded at the origination point, although it frequently is. Streaming is an alternative to file downloading, a process in which the end-user obtains the entire file for the content before watching or listening to it. Through streaming, an end-user can use their media player to start playing digital video or digital audio content before the entire file has been transmitted. The term “streaming media” can apply to media other than video and audio, such as live closed captioning, ticker tape, and real-time text, which are all considered “streaming text”.

👑👑👑 COPYRIGHT CONTENT 👑👑👑

Copyright is a type of intellectual property that gives its owner the exclusive right to make copies of a creative work, usually for a limited time.[1][2][3][4][5] The creative work may be in a literary, artistic, educational, or musical form. Copyright is intended to protect the original expression of an idea in the form of a creative work, but not the idea itself.[6][7][8] A copyright is subject to limitations based on public interest considerations, such as the fair use doctrine in the United States. Some jurisdictions require “fixing” copyrighted works in a tangible form. It is often shared among multiple authors, each of whom holds a set of rights to use or license the work, and who are commonly referred to as rights holders.[citation needed][9][10][11][12] These rights frequently include reproduction, control over derivative works, distribution, public performance, and moral rights such as attribution.[13] Copyrights can be granted by public law and are in that case considered “territorial rights”. This means that copyrights granted by the law of a certain state, do not extend beyond the territory of that specific jurisdiction. Copyrights of this type vary by country; many countries, and sometimes a large group of countries, have made agreements with other countries on procedures applicable when works “cross” national borders or national rights are inconsistent.[14] Typically, the public law duration of a copyright expires 50 to 100 years after the creator dies, depending on the jurisdiction. Some countries require certain copyright formalities[5] to establishing copyright, others recognize copyright in any completed work, without a formal registration. It is widely believed that copyrights are a must to foster cultural diversity and creativity. However, Parc argues that contrary to prevailing beliefs, imitation and copying do not restrict cultural creativity or diversity but in fact support them further. This argument has been supported by many examples such as Millet and Van Gogh, Picasso, Manet, and Monet, etc.[15]

👑👑👑 GOODS OF SERVICES 👑👑👑

Credit (from Latin credit, “(he/she/it) believes”) is the trust which allows one party to provide money or resources to another party wherein the second party does not reimburse the first party immediately (thereby generating a debt), but promises either to repay or return those resources (or other materials of equal value) at a later date.[1] In other words, credit is a method of making reciprocity formal, legally enforceable, and extensible to a large group of unrelated people. The resources provided may be financial (e.g. granting a loan), or they may consist of goods or services (e.g. consumer credit). Credit encompasses any form of deferred payment.[2] Credit is extended by a creditor, also known as a lender, to a debtor, also known as a borrower.
